Tevron® Solutions Fully Support All Microsoft 64-bit Operating Systems.

CitraTest, *CitraTest VU, and CitraTest APM are the only single license, integrated solutions for conducting application performance monitoring, functional, regression and latency testing for every enterprise application that is accessible from a Windows based machine.*

Nashua, New Hampshire, December 4, 2009 – Tevron today announced the addition of support for all Microsoft 64-bit operating systems to its suite of APM & Testing solutions.   In addition to monitoring and testing any application that is running on the Windows 64-bit platform, now Tevron's APM & Testing solutions can be run directly on any Windows 64-bit platform as well. These operating systems include Windows 7 x64 Edition, Windows XP x64 Edition, Windows 2008 Server x64 Edition, Windows 2003 Server x64 Edition, and Windows Vista x64 Edition.

With 64-bit support, IT organizations can take full advantage of the latest powerful PCs and optimize the monitoring and testing experience. With the latest releases of CitraTest, CitraTest APM, and CitraTest VU, Tevron again is taking the lead role in the APM & testing industry in providing support for every 64-bit Windows environment and every application that is accessible from every 64-bit Windows environment. As companies across the world upgrade to the 64-bit editions of the various Windows operating systems, Tevron's APM & testing solutions will continue to offer the industry lead for application monitoring, load testing, and general automation.
