Tevron® Adds Full Support for Microsoft Windows 7.

CitraTest, CitraTest VU, and CitraTest APM are the only single license, integrated solutions for conducting application performance monitoring, functional, regression and latency testing for every enterprise application that is accessible from a Windows based machine.

Nashua, New Hampshire, October 29, 2009 – Tevron today announced the addition of support for Microsoft Windows 7 to its suite of APM & Testing solutions.   Windows 7 is designed for faster and more reliable performance. With 64-bit support, you can take full advantage of the latest powerful PCs. With the latest releases of CitraTest, CitraTest APM, and CitraTest VU, Tevron again is taking the lead role in the APM & testing industry in providing support for every Windows environment including Windows 7 and every application that is accessible from Windows. As companies across the world upgrade to the new Windows 7 operating environment, Tevron's APM & testing solutions will continue to offer the industry lead for application monitoring, load testing, and general automation.

To learn more about Tevron's automated testing solutions or to request additional information, please call +1.702.518.7435 or visit http://www.tevron.com.
